

# Quiz (with Answers)

## 1. What do the following acronyms stand for?

QHIP	Queensland Health Immunisation Program
GPII	General Practice Immunisation Incentives
ACIR	Australian Childhood Immunisation Register
VIVAS	Vaccination Information & Vaccination Administration System
NIP	National Immunisation Program

## 2. Accurate reporting of childhood immunisation data is important because

(tick as many as applicable)

- Parents are paid incentives for ensuring their children are fully immunised
- A general practice is financially rewarded if their coverage rate is above 90%
- General practices are paid for reporting immunisation data to the ACIR
- Children who are not fully immunised can then be followed up with reminder

## 3. Answer *true* or *false* to the following statements:

Any vaccine administered to a child aged 0-7 years of age living in Australia can be reported to ACIR	TRUE
Children are considered due for their immunisations for one month before they are assessed as overdue by ACIR	TRUE
ACIR and Centrelink are linked to ensure parents receive payments related to immunisation	TRUE
“Natural immunity” to a vaccine-preventable disease should not be reported to ACIR	FALSE
A parent can contact VIVAS to obtain an immunisation history for their child	FALSE
Practices are notified of their immunisation coverage rates every quarter on their GPII Practice (Preliminary) Feedback Statement	TRUE
If a child cannot be immunised due to a medical contraindication, this should be reported to ACIR	TRUE
A practice needs to be accredited to register with the GPII scheme	FALSE
